• Fully made in stainless steel;
• High pressure pumps controlled by electronic inverter so high pressure valour can be control;
• High pressure pump with special nozzles to achieve an optimal screen opening result;
• Full 7 inches touch screen colour;
• Possibility to save UP to 10 programs;
• Clean water solenoid install so you can flash screen with fresh water in case you need;
• Possibility to flash water independent from both sides (front or back);
• Solid particle filter in water exit for environment water treatment;
• 100% program configuration possible (you can control how many passages you want from what type of water you need (recycle of clean); control front and back passages and also pressure apply to screen);
• Reduce water consumption up to only 5% from water usage in screen printing developing
• Door with sliding guides for easy loading;
• Light source behind for easy control from screen process;
