# FLOCKING DEVICE

The ET - 100 is a manual flocking device that can be used to flock flat surfaces. The device is equipped with an inductive sensor in grip for automatic START / STOP from high voltage. The ET - 100 is equipped with an automatic discharged switch from voltage to ground.

Possibility to have flocking boxes in 3 sizes : Small ,Medium and Large

Grip with inductive sensor for automatic working (automatic discharged from voltage to earth for operator safety);

Digital display from high voltage and amperes

Manual flocking generators for suitable for 3D available

### PRODUCT DESCRIPTION

- High voltage adjustable from 0 to 80 kV;
- Digital display from high voltage and amperes ;
- Possibility to have flocking boxes in 3 sizes : Small ,Medium and Large;
- High voltage cable with 6 meters lenght
- Automatic sensor for START/STOP from high voltage;
- Grip with inductive sensor for automatic working (autonatic discharged from voltage to earth for operator safety);
- Normal electrical connection - 220 Volts / 50 Hertz

Flocking device	Units	ET - 100
Range from high voltage valor	Kv	0 to 80
Lenght from high voltage cable	m	6
Maximum working amperes	◆ A	0 to 100
Weight	Kg	40
Voltage	V	230 / 50

Note: As características podem ser alteradas sem aviso prévio
