VERTSCREEN

The VERTSCREEN is a machine suitable to make the vacuum and make the contact between screen and film. The VERTSCREEN has the possibility to rotate the screen to 180 degrees so you can insolate the screen in vertical position. The VERTSCREEN can be equipped together with the halogen lamp LUX RAPID and also with the ACOSGRAF electronic board with photocell from light intensity measure to make automatic compensation from exposure times.

Possibility to make inversion from screen to vertical or horizontal position

Equipped with wheels to make deployment from the machine easy and comfortable and also equipped with yellow light to prepare the job

Possibility to the machine with ACOSGRAF electronic board with photocell from light intensity measure to make automatic compensation from

Halogen light source lamps LUX RAPID models available

PRODUCT DESCRIPTION

Possibility to make inversion from screen to vertical or horizontal position;
Equipeed with pressure meter measure system so you can have always perfect vacuum;
Low noise vacuum;
Yellow light to prepare the job;
Possibility to the machine with ACOSGRAF electronic board with photocell from light intensity measure to make automatic compensation from exposure times;
Possibility to equipped the machine with fully automatic operation method from vacuum and exposing operation with pressure reading control;
Equipped with wheels to make deployment from the machine easy and comfortable;
Other sizes can be requested by demand.

VERTSCREEN	Units	VERT 1012	VERT 1215	VERT 1520	VERT 2025
Maximum screen size	cm	100x125	120x150	150x200	200x250
External depth	cm				
External width	Cm				
External height	Cm				
Weight	Kg	120	142		290
Voltage	V	230	230	230	230
