BACPRINT DECANTATION + PROTECTION DOOR

www.acosgraf.com

The BACPRINT DECANTATION with protective door is a washing and developing tank used in the screen printing industry. The BACPRINT DECANTATION with protective doors is equipped with light box behind to help in better developing and washing the screens. The BACPRINT DECANTATION with protective door is fully built in stainless steel and as standard is equipped with water splashing door and a dirty water decanting system with 3 levels to remove solid particles. The BACPRINT DECANTATION with protective can also be equipped with inclination rails to place the screens; motor for solvent vapors aspiration, chimneys to aspirate vapors, etc...
