Color system identification from solvents clean/dirty

Bottom rail with inclination and leveling adjustment

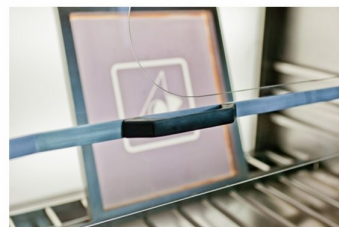

Individual pressure gauge from pressure apply to each pump

Full automatic water treatment systems available

Decanting solvents with 3 levels and easy cleaning

Acrylic transparent door to protect operator from water splashing as option

PRODUCT DESCRIPTION

- Modular construction in stainless steel;
- Solvent decanting with 3 levels;
- 2 pneumatic pumps for non-contamination of clean solvents;
- Screen rail horizontal holder with possibility of inclination adjustment;
- Prepared for application of fan for toxic vapors aspiration;
- Deposit of clean solvents;
- Solvent pumps with pressure gauge indicator;
- Possibility of having 2 independent circuits of effluents: water and solvents without cross contamination ;
- Color system brush for a better identification of clean / dirty solvents;
- Solvent deposits with level indication;
