Equipped with a pressure gauge and emergency stop button

Color chemicals encoding for easy identification

Fast union connectors and taps in order to make easy

Immersion pump included to pull up dirty water

Wastewater system has been designed to operate fully automatic

OSCAR 4000 wastewater system operates in three steps

## PRODUCT DESCRIPTION

- 3 cleaning steps in final water cleaning;
- No need to have operator nearby (process is complete automatic with minimal work labor required);
- possibility to have PH adjuster chemical;
- Pressure manometer and emergency stop switch for operator safety;
- Water counter unit to know how many liter from water has been treated and also control costs from treatment;
- Fully automatic system with FREE sludge production;
- Water treatment system made by active carbon filters to remove all hazard chemicals from water;
- More them 30 units install until now with 22 machines in France and some with ISO environment approval;
- No installation from tubes and other systems required (connect and start immediate working);
- Immersion pump in stainless steel already include in machine for customer commodity;

OSCAR	Units	OS 4000
Cap. water treatment per day	m3	4
External depth	cm	116
External width	Cm	182
External height	Cm	109
Power install	Kw	3
Weight	Kg	560
Voltage	V	230 / 50
